Professional Summary

Software Developer with hands-on experience building and deploying ASP.NET MVC REST APIs, backend systems, and ML inference pipelines across two internships and multiple independently scoped projects. Proficient in designing fully functional software systems — from database schema and API development to defect resolution and end-to-end documentation. Comfortable following industry-standard operating procedures, maintaining project reports, and delivering first-time-right solutions that meet client specifications. Seeking a Junior Developer role at Wipro to contribute to scalable digital transformation solutions.

Technical Skills

Backend & APIs: ASP.NET, ASP.NET Web API, RESTful API Design, JWT Authentication, Role-Based Access Control

Languages: C#, Python, JavaScript, Java, C++

Databases: MySQL, PostgreSQL, MongoDB, Query Optimization, Normalized Schema Design

Frontend: React, HTML, CSS, JavaScript (ES6+)

DevOps & Tools: Docker, Git, CI/CD Pipelines, Postman, Swagger, Render, Vercel

AI / ML: TensorFlow, EfficientNet, MobileNetV2, Image Classification, Model Training & Evaluation

Engineering Practices: Agile/Scrum, OOP, DBMS, Debugging, Defect Fixing, Technical Documentation

Experience

Software Developer Intern | Eqsoft Business Solutions Pvt Ltd

Jun 2025 – Jul 2025

- Designed and developed **12+** REST API endpoints using **ASP.NET MVC** to power client-facing business workflows, backed by a normalized MySQL database; produced full Postman-tested API documentation for client handoff
- Implemented **JWT-based authentication** and 3-tier Role-Based Access Control (RBAC), enforcing security at the API layer across all business-critical routes
- Performed MySQL query optimization through index tuning, reducing average execution time by **35%**; fixed defects raised during integration testing, achieving zero major issues post-deployment
- Maintained weekly status reports and a structured change log for all API modifications, ensuring complete traceability of design decisions for the client

AI Intern | Infosys Springboard

Dec 2025 – Mar 2026

- Designed and delivered a complete ML pipeline — data ingestion, augmentation, model training, and inference — using **TensorFlow** and Python; validated performance on held-out test sets and documented results for reproducibility and client review
- Improved EfficientNet model validation accuracy from **80% to 92%** across **10 crop categories** through iterative hyperparameter tuning, following structured development and QA procedures throughout

Projects

AgriDetect AI | Python, FastAPI, EfficientNet, Docker

Live Demo

- Architected **8** FastAPI endpoints with JWT-secured access and sub-300ms average response time; containerized with Docker and deployed via automated CI/CD pipeline — achieving **92% accuracy** across 10 crop disease categories
- Produced complete API documentation using Swagger and maintained deployment logs to support reproducibility and future feature upgrades

Blockchain Product Verification System | Node.js, Express.js, MongoDB, React

Live Demo

- Engineered **10** backend API endpoints for product authentication and blockchain verification using Node.js and Express.js, with full Postman-tested documentation covering all request/response contracts
- Designed an indexed MongoDB schema to prevent duplicate and fraudulent product registration; integrated Web3.js for on-chain transaction calls on Ethereum testnet (Sepolia)

Education

B.Tech in Computer Science and Engineering

2022 – 2026

College of Engineering Thalassery, Kerala

CGPA: 8.88 / 10

Certifications

Infosys AI Virtual Internship Certificate | IBM Full Stack Software Developer Professional Certificate | UPCODE AI Bootcamp Certificate
