Professional Summary

Frontend-focused Computer Science engineer with hands-on experience building responsive, component-based web applications using React, JavaScript (ES6+), HTML5, and CSS3. Delivered production-deployed UIs across two internships and multiple independently scoped projects, integrating RESTful APIs and focusing on performance, cross-browser compatibility, and clean UI/UX. Comfortable with the full frontend development lifecycle — from wireframe to deployment — using modern tooling including Git, Docker, and CI/CD pipelines. Targeting entry-level Frontend Developer roles where UI quality and user experience matter.

Technical Skills

Frontend Core: HTML5, CSS3, JavaScript (ES6+), ThreeJs

Frameworks & Libraries: React, React Hooks, React Router, Context API, Bootstrap, Tailwind CSS

UI & Styling: Responsive Design, Flexbox, CSS Grid, Cross-browser Compatibility, Web Accessibility

API Integration: RESTful API Consumption, Axios, Fetch API, JSON, JWT-based Auth Flows

Tools & DevOps: Git, GitHub, Docker, CI/CD Pipelines, Vercel, Render

Backend: Node.js, Express.js, FastAPI, Python

Practices: Component-based Architecture, Agile/Scrum, OOP, SDLC, Debugging, Postman

Experience

AI Developer Intern | Zecser

May 2026 – Present

- Developing **ZecPath AI**, an AI-powered recruitment and HR automation platform focused on resume parsing, candidate screening, and intelligent skill extraction
- Built NLP-based pipelines for extracting skills, education, and experience data from resumes using Python and machine learning techniques
- Worked on synchronous and asynchronous AI workflows for scalable resume processing and automated candidate evaluation

Software Developer Intern | Eqsoft Business Solutions Pvt Ltd

Jun 2025 – Jul 2025

- Developed and integrated **12+** RESTful API endpoints with frontend workflows using ASP.NET MVC; designed and validated UI data flows against a normalized MySQL backend, ensuring consistent user-facing functionality
- Implemented JWT-based authentication flows and RBAC-gated UI route protection; resolved cross-browser rendering issues and improved page response consistency

Projects

AgriDetect AI | React, FastAPI, EfficientNet, Docker, CI/CD

Live Demo

- Designed and built a fully responsive React frontend for a crop disease detection web app; implemented reusable component architecture, image upload UI, and real-time prediction result display achieving **92% model accuracy**
- Integrated **8 FastAPI endpoints** via Axios with JWT-secured access; deployed frontend via CI/CD pipeline to Vercel with sub-300ms average response time

Blockchain Product Verification System | React, Node.js, Express.js, MongoDB, Web3.js

Live Demo

- Built a React-based frontend for blockchain product authentication, implementing multi-step form flows, dynamic product status displays, and Web3.js wallet interaction components for Ethereum Sepolia testnet transactions
- Applied responsive design principles across all views; consumed **10 RESTful API endpoints** using Fetch API with full error handling and loading state management

Smart Helmet Accident Alert System | JavaScript, PHP, MySQL, IoT

- Developed a real-time dashboard UI to visualize live accelerometer and GPS sensor data from IoT devices, displaying collision alerts within **500ms** of event detection with auto-refreshing status components

Education

B.Tech in Computer Science and Engineering

2022 - 2026

College of Engineering Thalassery, Kerala

CGPA: 8.88 / 10

Certifications

Infosys AI Virtual Internship Certificate, IBM Full Stack Software Developer Professional Certificate, UPCODE AI Bootcamp Certificate
