Professional Summary

Full Stack Computer Science engineer with end-to-end development experience across React frontends, Node.js and Python backends, RESTful API design, and cloud deployments. Delivered production-grade applications spanning AI, blockchain, and IoT domains across two internships and three independently scoped projects. Proficient in the complete full stack lifecycle — UI development, API design, database schema, authentication, containerization, and CI/CD deployment. Targeting entry-level Full Stack Developer roles where ownership of the entire application stack drives meaningful product outcomes.

Technical Skills

Frontend: React, Context API, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind CSS, Responsive Design

Backend & APIs: Node.js, Express.js, FastAPI, ASP.NET MVC, RESTful API Design, JWT Authentication, RBAC, Swagger

Databases: MySQL, PostgreSQL, SQL Query Optimization

DevOps & Cloud: Docker, Git/GitHub CI/CD Pipelines, Vercel, Render

Languages: JavaScript (ES6+), Python, Java, C

AI / ML: TensorFlow, EfficientNet, Transfer Learning, Image Classification, Model Deployment

Experience

AI Developer Intern | Zecser

May 2026 – Present

- Developing **ZecPath AI**, an AI-powered recruitment and HR automation platform focused on resume parsing, candidate screening, and intelligent skill extraction
- Built NLP-based pipelines for extracting skills, education, and experience data from resumes using Python and machine learning techniques
- Worked on synchronous and asynchronous AI workflows for scalable resume processing and automated candidate evaluation

Software Developer Intern | Eqsoft Business Solutions Pvt Ltd

Jun 2025 – Jul 2025

- Built **12+** RESTful API endpoints using ASP.NET MVC integrated with a normalized MySQL database; developed corresponding frontend data flows for client-facing business workflows
- Implemented JWT-based authentication, 3-tier RBAC, and session management across the full stack; reduced MySQL query execution time by **35%** through index tuning and query restructuring

Projects

AgriDetect AI | React, FastAPI, Python, EfficientNet, Docker, CI/CD

Live Demo

- Developed a full-stack crop disease detection application: React frontend with responsive image upload UI and FastAPI backend serving a **92% accurate** EfficientNet model across 10 categories; containerized with Docker
- Architected **8 RESTful API endpoints** with JWT authentication and sub-300ms average response time; deployed via automated CI/CD pipeline to Vercel

Blockchain Product Verification System | React, Node.js, Express.js, MongoDB, Web3.js

Live Demo

- Built end-to-end: React frontend for product verification flows and a Node.js/Express.js backend with **10 RESTful API endpoints**; integrated Web3.js for Ethereum Sepolia testnet on-chain transaction calls
- Designed an indexed MongoDB schema to prevent fraudulent product registration; applied MVC architecture with full Postman-documented API test coverage

Smart Helmet Accident Alert System | JavaScript, PHP, MySQL, IoT, REST API

- Engineered a full-stack IoT application: real-time dashboard frontend and a PHP backend ingesting accelerometer and GPS sensor data, triggering emergency alerts within **500ms** of collision detection
- Designed a normalized MySQL schema across **5 relational tables** with full referential integrity for sensor logs, user profiles, and alert events

Education

B.Tech in Computer Science and Engineering

2022 - 2026

College of Engineering Thalassery, Kerala

CGPA: 8.88 / 10

Certifications

Infosys AI Virtual Internship Certificate, IBM Full Stack Software Developer Professional Certificate, UPCODE AI Bootcamp Certificate
